

FUE-M/T 13A

Portable frequency converters

Light, sturdy and powerful

The frequency converters of the FUE series are distinguished by their light and compact design. Thanks to the aluminum design, they are easy to handle. With their high-quality electronics and the active cooling system, these machines deliver the highest output even in long-term application. The intelligent load and voltage management is particularly practical. It compensates for fluctuations of mains input voltage, incorrectly dimensioned extensions or appliances with greatly varying use of power.
